About

Product leader with extensive experience in the FinTech (Circle) and Big Data industries (Microsoft: Office and Windows Data), I have a proven track record of delivering deeply technical products, driving innovation, and delivering business value in both startup and enterprise environments.

At Circle, I was the Product Manager responsible for expanding USDC to new networks. I have successfully launched and scaled USDC on multiple blockchains, reaching over 500,000 wallets worldwide with \$100M in stablecoin circulation, and generating \$10M+ in annual recurring revenue (ARR).

At Microsoft, I was the Product Manager for the developer-facing data platform of the biggest data team at Microsoft. This platform was used by over 400 developers to produce 20,000 datasets daily.

I have experience scaling products, driving the next wave of adoption and usage by establishing and integrating with key partners, and shipping 0 -> 1 products, providing the clarity and energy that teams need to thrive in ambitious situations.

I thrive in fast-paced environments that demand strong cross-functional collaboration and strategic thinking. I am passionate about leveraging technology to solve complex challenges and creating intuitive products that delight users while achieving business goals.

Outside of the tech world, I am an avid reader and a firm believer in the power of writing to bring clarity to complex situations. Whether driving product innovation or seeking personal growth, I am always eager to learn and evolve.

Feel free to connect if you're interested in discussing product management, technology, or exploring collaboration opportunities!

Given

**Darren Higgins** · 1st

Operations

November 19, 2016, Darren was senior to Maurizio but didn't manage Maurizio directly

While working with Maurizio I was thoroughly impressed with his work ethic and drive. He went above and beyond to deliver on any task that was assigned to him. His ability to be a "team player" was also impressive. He was willing to help myself and any other manager with projects when he could. He will make a great addition to any team he works with, and will become a great asset to a company as well.
